

CONFIGURE EMAIL USING GMAIL ACCOUNT

(via SSL Setting)

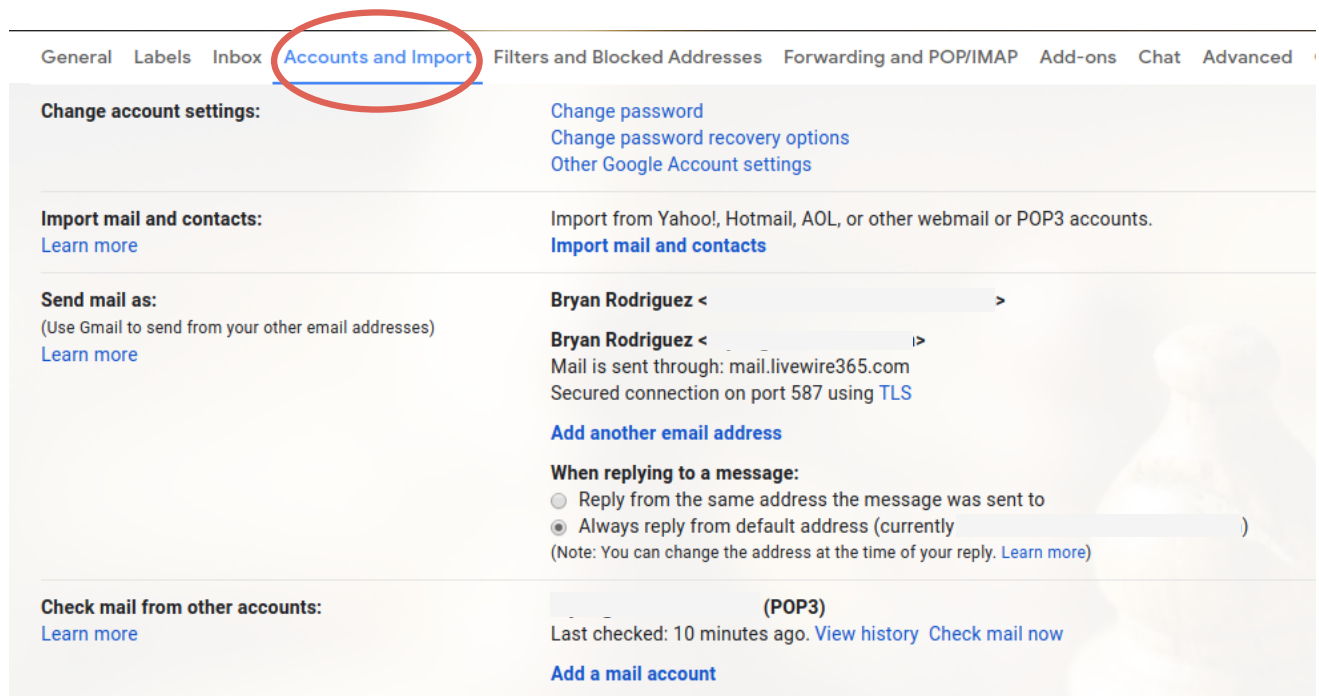

1

Log into your Gmail account. Click the settings icon and then from the given choices look for the Settings option.

2

On the settings section, look for the 'Accounts and Import' picks along the ribbon part of the page, this will guide you to connect your webmail into your Gmail account.

General Labels Inbox **Accounts and Import** Filters and Blocked Addresses Forwarding and POP/IMAP Add-ons Chat Advanced

(POP3)
Last checked: 10 minutes ago. [View history](#) [Check mail now](#)
[Add a mail account](#)

3

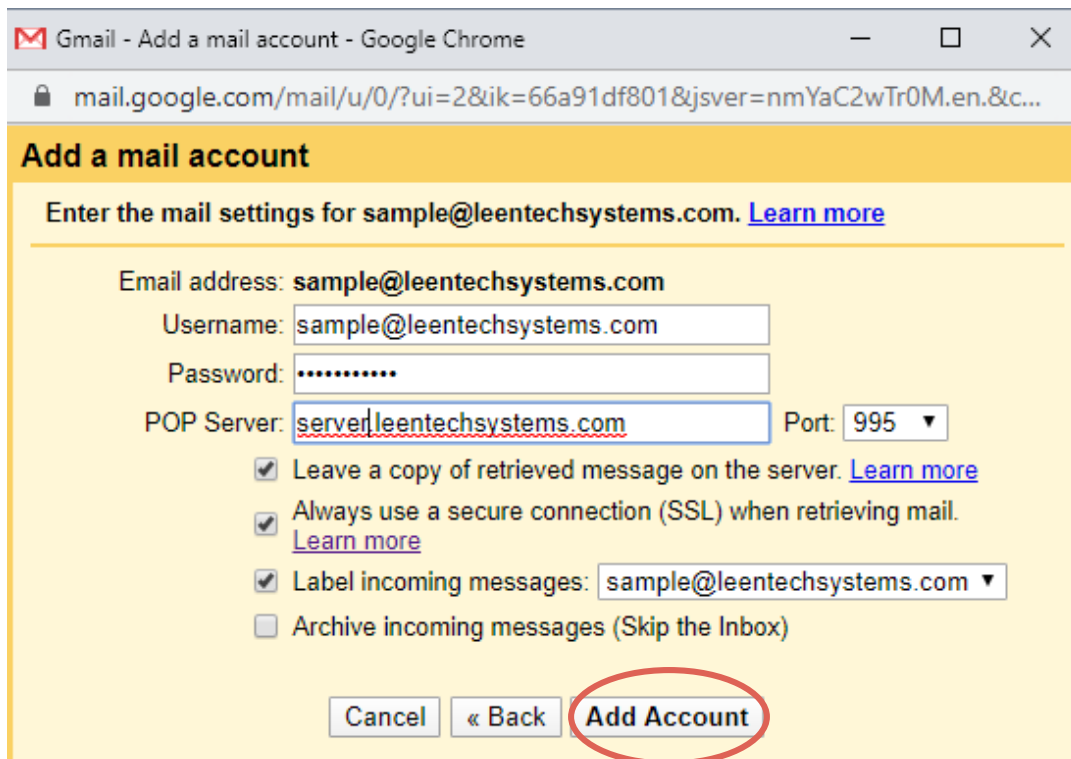

Then a form will display to configure the email address that you want to import into your account. Just follow the steps and make sure that you have entered the correct information details of your email account. Click 'Next' to continue with the process.

Click 'Next' button.

4

Enter the mail setting of your email account, make sure that you have entered the correct email, password and mail server for the account.

Add a mail account

Enter the mail settings for sample@leentechsystems.com. [Learn more](#)

Email address: sample@leentechsystems.com

Username: sample@leentechsystems.com

Password:

POP Server: server.leentechsystems.com Port: 995 ▼

☒ Leave a copy of retrieved message on the server. [Learn more](#)

☒ Always use a secure connection (SSL) when retrieving mail. [Learn more](#)

☒ Label incoming messages: sample@leentechsystems.com ▼

☐ Archive incoming messages (Skip the Inbox)

[Cancel](#) [« Back](#) **Add Account**

Then from the checkbox provided, click the 'Leave a copy of the retrieved message on the server', 'Always use a secure connection (SSL)' and 'Label incoming messages' so that you'll not be able to get confused with those email you've been received.

Click 'Add Account' to add your mail into the Gmail. And then the form will say that you have added your mail account.

5

Click 'Next'.

6

One more step, there will be a verification code sent into your webmail account just to confirm that you have entered the correct data. Enter the verification code and then click 'Verify' to complete the whole process.

The screenshot shows a web browser window titled "Gmail - Add another email address you own - Google Chrome". The address bar shows a URL from mail.google.com. The main heading is "Add another email address you own". Below it, a sub-heading reads "Confirm verification and add your email address". The message states: "Congratulations, we successfully located your other server and verified your credentials. Just one more step!" It then says: "An email with a confirmation code was sent to **sample@livewire365.com**." There is a link "[Resend email]". Below this, it says: "To add your email address, do one of the following:". There are two options: "Click on the link in the confirmation email" and "Enter and verify the confirmation code". The second option is selected, showing a text input field and a "Verify" button. At the bottom, there is a link "Close window".

The screenshot shows the "Check mail from other accounts:" section in Gmail. There is a link "Learn more". A red arrow points from this section to a list of accounts. The first account is "Bryan Rodriguez <sample@leentechsystems.com>". Below the name, it says: "Mail is sent through: server.leentechsystems.com" and "Secured connection on port 465 using SSL". At the bottom of the list, there is a link "Add another email address".
